EXPERTS IN FREIGHT & LOGISTICS

NCVEN is established as your trusted, full-service logistics partner. Our strategic position, in close proximity to Houston's International Airport, grants us an unparalleled operational advantage, ensuring maximum fluidity for your cargo shipments.

OUR SERVICES

Based in Houston, Texas, NCVEN is established as your trusted, full-service logistics partner. Our strategic position, in close proximity to Houston's International Airport, grants us an unparalleled operational advantage.

OVERSIZED CARGO

We specialize in complex projects involving the movement of equipment that exceeds standard dimensions or weight (Heavy Lift / Out-of-Gauge (OOG)). From securing special permits and performing route surveys to utilizing specialized equipment (modular trailers, flat racks, break-bulk vessels), NCVEN guarantees the safe and efficient execution of your project, regardless of your cargo's size or complexity.

AIR FREIGHT

Air freight is a catalyst for international trade and a pillar of the modern economy, facilitating globalization and the efficiency of Just-in-Time (JIT) supply chains. Professional management of air freight involves the precise coordination of ground and air operations, aircraft maintenance, airport slot management, and rigorous attention to cargo integrity.

OCEAN FREIGHT

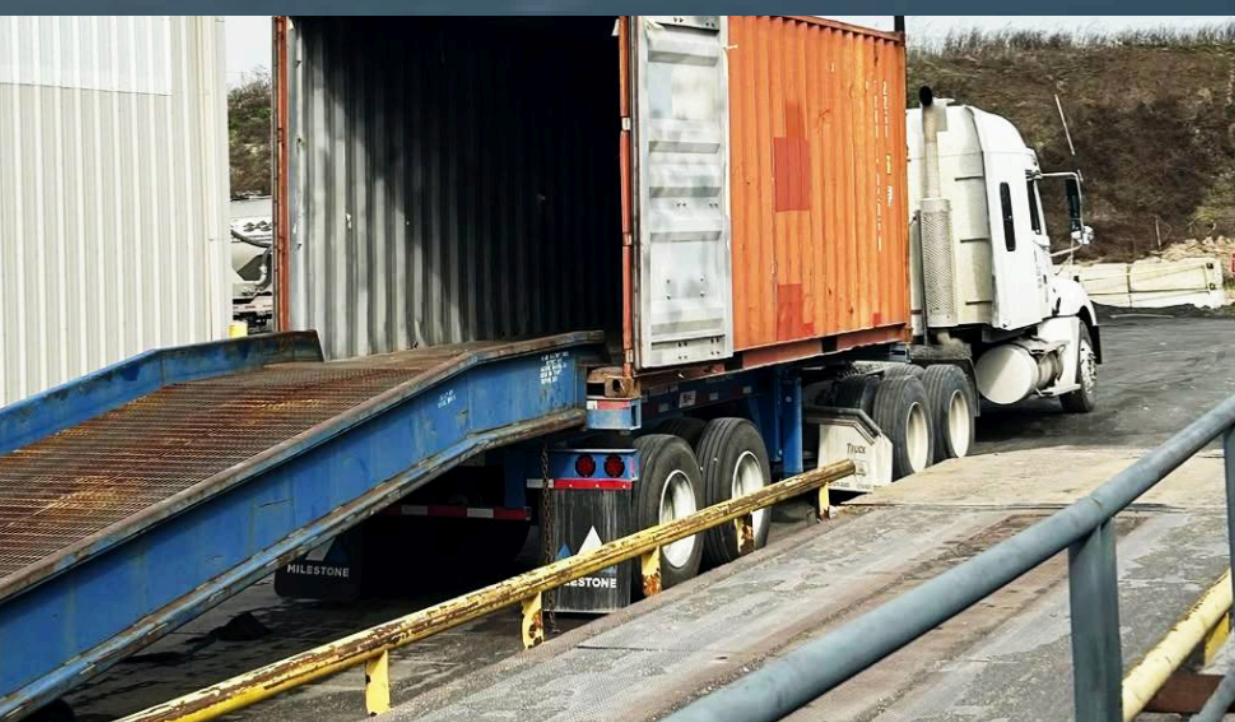

Ocean freight is a driver of the global economy and an irreplaceable component of cargo logistics. Its operation demands rigorous coordination of routes, fleet maintenance, port management, and strict adherence to international safety regulations (SOLAS) and environmental protection mandates (MARPOL). This ensures that goods arrive at port safely, efficiently, and cost-effectively.

GROUND TRANSPORTATION

Nos especializamos en proyectos complejos que involucren el movimiento de equipos que exceden las dimensiones o el peso estándar (Heavy Lift / OOG). Desde la obtención de permisos especiales y estudios de ruta, hasta el uso de equipo especializado (remolques modulares, flat racks, buques de carga a granel (break bulk)), NCVEN garantiza la ejecución segura y eficiente de su proyecto, sin importar el tamaño o la complejidad de su carga.

DOOR TO DOOR

The Door-to-Door service represents a Turnkey Solution that minimizes risk, operational complexity, and the need for client management. It is the ideal choice for companies looking to optimize their time, guarantee traceability, and transfer the complexity of international logistics to a single operator, ensuring that merchandise crosses borders without interruption.

CUSTOMS MANAGEMENT

Professional Customs Management is vital to ensuring the legality of operations and avoiding sanctions, fines, or cargo seizures. It ensures the fluidity and predictability of merchandise flows, minimizing transit times and unexpected costs. This allows businesses to operate within the regulatory framework and take full advantage of international trade agreements.

CARGO INSURANCE

Our Cargo Protection service encompasses the set of measures, protocols, and technologies designed to safeguard the physical integrity, security, and economic value of merchandise throughout the entire supply chain, from the point of origin to final delivery.

MULTIMODAL TRANSPORT

It is an advanced logistics solution that consists of moving goods using two or more different modes of transport (e.g., truck, ship, and/or plane) from a point of origin to a final destination. This is all managed under the responsibility of a single logistics operator and covered by a single transport contract.

Professional Warehousing Management is critical for optimizing inventory levels, reducing operating costs, and ensuring speed and accuracy in order fulfillment, thereby acting as the main regulator between supply and demand.

WAREHOUSING

HAZARDOUS CARGO

At NCVEN, we have certified personnel to manage the air, ocean, and ground transport of all classes of hazardous materials (explosives, gases, flammable liquids, corrosives, etc.).

We ensure your merchandise is properly classified, packaged, labeled, and documented, guaranteeing a safe and legal movement across international borders.
